SPIN AND SOLVE

A

player 1's tallies

Use a paperclip and pencil to create a spinner. Spin spinner 'A' first. Put that number on the first blank on the recording sheet. Spin spinner 'B' next. Write that number as the sum on the recording sheet. Count up to see what number is missing then write that number in the box. Player 2 does the same thing. The person that used the largest missing number inside the box gets one point. Use tallies to keep track of the score.

B

player 2's tallies
